- Corners Having Information In This File:
- = Information Only
  - = Monument: Pipe, Stone, Stake, etc.
  - ⊙ = Casting: Iron, Aluminium, etc.
  - ⊗ = Casting: Certificate Prepared.
  - ⊕ = Casting: Coordinates Computed.

The Cass County naming convention is a modification of the USFS alpha-numeric index. We have added the Township and Range before each, and divided the distance between each alpha and numeric grid line to the nearest tenth. One tenth of the distance between the normal grid spacing is 2 chains or 132 feet. This provides a unique identifier for most corners and is how Cass County will tag data attributed to a corner. After the corner ID, anything can be added to augment the description.
