Statement of Evidence: Northeast Corner Section 31, Township 135 North,  
Range 31 West, 5th Principal Meridian

The Original Public Land Survey was run in 1870 and a wood post was set to mark the corner.

The Township ledger showed that in 1904 the road south was accepted, being in place more than 6 years. This indicates that the area roads were in place in 1898.

No other records could be found and long time residents knew of no corners in place.

In 1979 the Minnesota Department of Transportation set this corner on the fence line north and the road east-west. This location falls 7 foot east of the road south but fits a proportionate distance to the occupation quarter and section corners for one and one-half miles west and two miles east. It also fits the original call to the creek east. This indicates that the fence location is a direct result of previous survey work.

For details and survey analysis contact the Minnesota Department of Transportation District Surveys Office in Brainerd.
