## Statement of Evidence:

- 1874 P.F. Conger, U.S. Deputy Surveyor, subdivided the Township. He set a post to mark the corner and marked four bearing trees as accessories; a Black Pine 8 inch South 45 degrees West 10 links, a Black Pine 8 inch North 56 degrees East 15 links, a Black Pine 10 inch North 61 degrees East 29 links and a Black Pine 10 inch South 35 degrees West 38 links.
- 1914 J.A. Doney, Forest Ranger, found a Jack Pine stake and a fallen Jack Pine bearing tree Southwest.
- 1974 Charles E. Akin Jr, Cadastral Surveyor, Bureau of Land Management, subdivided part of section 25. He indicates nothing was found and the corner was set lost by double proportion measurement. He did not monument the corner.
- 1981 David D. Claypool Iand Surveying, subdivided section 24 for the Bug School site. This corner was set by lost methods, double proportion between the original M.C. position, between sections 25 and 26 in Portage Iake, and the Northwest corner of section 24 as found and from the Southeast of section 24 to the N.C. between sections 23 and 26 as set by BIM on the East shore of Portage Iake. This position agrees mathmatically with the position as described by BIM in 1974.
