## Statement of Evidence:

NORTH QUARTER CORNER OF SECTION 10, TOWNSHIP 141 NORTH, RANGE 26 WEST OF THE 5th PRINCIPAL MERIDIAN.

The original public land survey was run in 1871 by Walker, Allen and Putnam. A post was set to mark the corner and two bearing trees were marked and recorded as accessories; An 8" tamarack that bears N40°E-18 links(11.88 ft.); and a 4" tamarack that bears S12°W-18 links(11.88 ft.). The notes of this survey are on file in the office of the Secretary of State, St. Paul, MN.

On October 26, 1994 Tom Miller, RLS and Jon Larson of Schellack Engineering and Land Surveying traversed to a point midway between the southwest and southeast corners of Section 3 to establish a search location. An approximate corner location tag set by the USFS was found approximately 15 feet south of the search location. A search of the USFS records didn't reveal any history of the location tag. The area was carefully searched for any sign of a post or bearing trees. A 5 foot diameter hole was dug in the swamp in search of the original post. No evidence of the original post or original bearing trees was found during the search.

After analysis of the above information, it was determined that the corner is lost. The corner was re-established by single proportionate method between the southwest and southeast corners of Section 3. USFS Contract, 1994-95

For additional information, contact the Cass County Surveyor's Office in Walker, MN.
