Statement of Evidence

Northeast corner Section 17, Township 143 North, Range 31 West

The original corner was established and monumented by the Government Land office in 1879. The monument set is described as a post which is assumed to be a wood post. Four bearing trees were tied in for future reference.

On May 24, 1976, the D.N.R. Engineering Bureau contacted the Cass County offices of Recorder, Auditor, Engineer, Surveyor and the Minnesota Department of Transportation.

In 1919 the GLO Resurveyed the area and found a galvanized iron pipe, 21/2" diameter, set by the County Surveyor, north and alongside the Local Post The GLO set an iron post, 36" x 2", 28" in the ground, with brass cap marked. Two original bearing trees were in place and two new bearing trees were located for future reference.

The 1931 alignment plans for Minn. #371 identify the corner as a U.S.G.L.O. iron pipe with brass cap.

On January 19, Emmons and Olivier Resources located the corner. It had a Cass County Monument. After analysis of all survey information the corner was accepted as marking the location.
