SKETCH OF REFERENCE TIES

MONUMENT MARKED:

STATEMENT OF EVIDENCE RELATIVE TO THIS CORNER LOCATION IS ON BACK OF PAGE

WEST QUARTER CORNER - SEC. 18, T. 139, R. 26, 5TH P.M.

- 12/11/1863 The United States Public Land Survey - Original Survey was performed by Johnson & Thornton for the township lines and the subdivision for sections.
- 4/26/2010 Arro Land Surveyors, LLC determined a search area for this corner using the lost corner method (single proportionate) from the northwest corner of Section 18 to the southwest monumented corner to Section 18. The measured distance between these two corners is 5308.93 feet. We searched our search area and found no remnants of the post or accessories (bearing trees) established by the original survey. Since our search area found no evidence of the post or bearings trees from the original survey we determined the location of this corner using the lost corner method (single proportionate) as described above. We set a ½ inch iron pipe 14 inches long with plastic cap marked "RLS 17768 distant halfway (2654.465 feet) between the northwest and southwest corners to Section 18. Bearing trees are noted on the front.
