To the board of Supervisors
May Township.

Bridgeman, Minn.

November 12th, 1914.

We the undersigned, citizens of the Town of May after a careful consideration of the benefits to be derived by the new proposed wagon road to be laid out from the Crowwing River bridge running East feel that it is a big advantage to the whole township to have this road established and hope that your honorable board will consider the matter favorably. It is easily seen that this is the only way whereby these located in the Southern part of the Township can get to Motley without going at least three miles further upon each trip to town. It does not make the road to Motley any further for those living in the North end of the Town and in fact gives them a better road. It is an easier road to build and maintain. For these reasons we hope that you will see fit to grant the road.
