As I cannot check on
my old survey it seems
as tho Knutson had
pulled up his old stakes
and set them about 1.5 N
along the so side of
Whit opposite First Natl
Bank

This would throw my
x. Cross in mid. walk
1.5 to far south

I decide to use the
the old mid. walk in front
of First Natl on N line
and move my cross x
1.5 further north to
avoid a low nit

Nix + Cross OK on N + S But maybe
.80 feet too far west?

that may (+) be O.K. or 6 E.T.W.
but guess 1.5 N

We will see later.

I will put the

see what I can make

Sept 14-1927 continued

At the meeting: I explain that: The uniform drop from Ben Anderson's Garage at Cor of Church Street & Front St to Farmers State Bank at Main St and First Avenue is about "4 1/2 Tenths of one percent" and that is all I can get in order to pass this trip of present Curb at Solberg's Filling station on So side Main & E side of Second Ave &c. Standard drop should be "5 Tenths of one percent"

See Page 78 where I figured amount of Curb now needed

I work all day for Doc Morrow

Alma & Reed to Beaman for
Dairty 1-PM. Lewis Aving
gets into argument with Village
Council at Pequot and comes
for me. I meet the Board and
explain that my curve
grade at Aving's Corner is
perfect and, as Mr Salburg
wants a 6" gutter below the
curbs he will have to grade
out the dirt and he will then
have the same uniform drop
of one half of 1%. East to Farmers
Flat Bk Co. Mrs Lewis Aving
and children bring me home to
