To run the lines and set TMS at all Section Corners

Try this 71 Townships =

$$2556 \text{ Sections} @ \$112. \text{ per section}$$

$$= \$286,272.00$$

To Subdivide all sections @
\$640 each (\$1. per acre) would cost
\$1,635,840 A Million and a

Lots of other big stumps near so that later I can easily locate the true corner from this old stump.

I do not tell the crew for fear they may destroy this old stump before I can get back after the snow goes down - then I will show it to them all as soon as I can get new ties to hold the corner with plenty of witnesses present.

I tell Ryan he can build on the East 100 feet with probable safety and on the west 100 ft unless Quinn has sold some land West of him. He asks me to reach to Brainerd and check the records.

Reed & I rush to Quinn. Call Earl Jenkins whom says he will wait to return N-04 PM - at St Hs 4-19-15 minutes for 16 mile - Jenkins speaks there and looks but I can find nothing very close to his land on the west.

L. St Hs 5+ Offer Jenkins money for helping but he refuses.
