1870 This corner was established by the Government Land Office. A post was set to mark the corner and was witnessed by the following bearing trees:

Blk Pine	6"	N17°E	176 Links
Sp Pine	6"	S85°W	220 Links

The DNR did not find any other records pertaining to this corner.

2011 In May, the DNR survey crew made a search for evidence of the corner and located the centerline intersection of gravel township roads east-west and north and an old road bed south. A 3/8" rebar was also found +/- 41' westerly of the road intersection. Fence line occupation was located along the vicinity of the west 1/16th line of the Section. A distance of 1327.4' was measured from the intersection of the east-west road and northerly extension of the fence south to the Northwest corner of Section 9 and a distance of 1327.6' was measured from the intersection of the east-west road and northerly extension of the fence south to the road intersection to the east. After analysis, the centerline intersection was determined to be the best available evidence and its location the position of the corner. This was supported by the fence line running along the west 1/16th line of the Section. The found rebar was not accepted as the corner location as there was no evidence to support its location. A 3/4" x 24" rebar with cap stamped "MN DNR LS 47461" was set at the corner to mark its position and reference ties were taken.

Northeast Corner Section 9 bears N89°33'46"E 2618.49'

Northwest Corner Section 9 bears N89°33'46"W 2654.99'
